MUHAMMAD
HASNAIN

Web · IoT · Robotics

Front-End Developer | UI/UX Designer | IoT & Robotics Engineer

✉ mhasnain818283@gmail.com ☎ +92 3141516703 📍 Gul Colony 🔗 LinkedIn:
Muhammad Hasnain

Creative developer with hands-on experience in building responsive web applications, IoT systems, and robotics projects. Proficient in Laravel, PHP, Arduino, ESP32, and sensor integration. Passionate about solving real-world problems through technology.

EDUCATION

B.E. Computer Systems Eng.

(Continue)

UET Peshawar

FSc – Intermediate

Islamia College

Matriculation

AMS School

TECHNICAL SKILLS

Web

HTML, CSS, JS, Bootstrap, Tailwind, Laravel, PHP

Database

MySQL, MariaDB, 3NF, Eloquent ORM

IoT HW

Arduino, ESP32, ESP8266, Raspberry Pi, Relay, Servo, PIR, IR, DHT22, MQ-2, RFID

IoT SW

MQTT, ThingSpeak, Blynk, C/C++, MicroPython

Robotics

Motor Drivers, Sensor Fusion, Automated Control

UI/UX

Figma, Adobe XD, Wireframing

Tools

Git, GitHub, VS Code, Arduino IDE

PROJECTS

1. Mental Health Counseling Portal — Web — Ongoing

Laravel · MySQL · PHP · Blade Templates

- › Role-based portal for Patients, Therapists & Admins with appointment booking.
- › Mood tracker, session records & 3NF normalized DB with 7 tables.
- › Responsive Blade UI with status tracking (Pending/Approved/Cancelled/Completed).

2. Employee Management System — Web

Laravel · MySQL · MVC · Eloquent ORM

- › Full CRUD for employee profiles, departments, and roles.
- › Role-based access control, dashboard with statistics and department summaries.

3. Smart Hostel Monitoring System — IoT

ESP32 · MQTT · PIR · DHT22 · MQ-2 · MySQL

- › Real-time room monitoring with temperature, gas, flame & motion sensors.
- › RFID access control, automated alerts via SMS & push notifications.
- › Web dashboard for live sensor data and occupancy status.

4. IoT Environmental Monitoring — IoT

Arduino · ESP8266 · ThingSpeak · C++

- › Sensor network for temperature, humidity, air quality & light intensity.
- › Wi-Fi data transmission to ThingSpeak with live graphs and threshold alerts.

5. Robo ARS Scorer Robot — Robotics

Microcontroller · Sensors · Motor Drivers · C/C++

- › Robotic system for automated scoring with target detection sensors.
- › Motor controllers for precise navigation; calibrated for accurate scoring.

6. Automatic Door System — Embedded

Arduino · IR/PIR Sensors · Servo Motor · Logic Circuits

- › Proximity-triggered door system using IR/PIR sensors and servo motor.
- › Safety delay logic to prevent rapid repeated triggering.

7. Home Automation System — IoT

Arduino · ESP8266 · Relay Modules · Blynk

- › Controls household appliances via relay modules and mobile app (Blynk).
- › Manual override with expandable design for additional rooms and devices.
